

Partnerships

The Queensland Academy for Creative Industries benefits from a unique partnership between Education Queensland and the Queensland University of Technology (QUT), in particular the dynamic and world-leading Creative Industries Faculty.

In this partnership, QUT will benefit from an association with the state's most talented and high performing students.

Our students will gain from an early measured introduction to tertiary life that will better prepare them for the university experience.

To obtain the benefits of powerful learning that can be achieved through the arts, the Queensland Academy for Creative Industries is developing a broad range of significant arts community and business relationships.

The overall impact of these relationships will create new and dynamic opportunities for students and teachers.

The fabric of the community becomes seamlessly interwoven with that of the Academy.

This rich learning environment delivers opportunities for all creative workers within and beyond our community to reap cultural and economic benefit from working with our young people.
